Department of Economics

Perspective Plan

The study of Economics provides students with a comprehensive understanding of how individuals, businesses, and governments make decisions about the allocation of resources. Graduation degree course in Economics provides a solid foundation in economic principles, analytical thinking, and research skills among students. The course helps the students to develop a comprehensive understanding of economic principles, theories, and real-world applications to prepare students for careers and informed citizenship. The graduation degree course in Economics develops the power of critical thinking and analytical skills among the students. Students become aware of global and local economic issues. Our department collect feedback from students regularly and act on feedback from students regarding the course and teaching methods.

The department's future plan focuses on nurturing students through both academic curriculum and student-centric activities to enhance their overall development. The perspective plan of the Department of Economics includes:

- Initiate efforts for the overall enhancement of the department.
- Arrange State and National Level Seminars in the department, sponsored by the UGC.
- Provide students with opportunities to engage in small-scale research projects and write papers.
- Incorporate additional ICT-enabled teaching methods, such as implementing smart classrooms.
- Arrange guest lectures by inviting experts from various branches of Economics.
- Introduce additional Value-Added Courses in Economics that are open to students from other departments.
- Promote interdisciplinary engagement by involving faculty and students in joint lectures and collaborative projects with the Commerce and History departments.
- Engage in collaborative academic endeavours with other institutions, such as co-authoring ISBN publications, hosting seminars, inviting guest speakers, and developing course content.
- Facilitate interdisciplinary lectures and collaborative projects involving faculty and students from both the Commerce and History departments.
- Encourage faculty members to engage in research, publish scholarly work, attend seminars, workshops, faculty development programs, and participate in orientation and refresher courses to enhance both their teaching abilities and research expertise.

- Organize classes covering fundamental computer skills, including Microsoft Paint, Word, Excel, PowerPoint, email usage, PDF creation, and scanning techniques.
- Motivate students to actively participate in the annual departmental Wall magazine by submitting their own hand-painted artwork, relevant paper cuttings related to significant economic events, current affairs and creative collages.
- Promote student-led cultural events that highlight their extracurricular talents, particularly in the performing arts.

Progress is a collective effort that involves faculty, students, and external stakeholders. By staying adaptable, fostering intellectual curiosity, and embracing change, the Economics department can thrive and contribute significantly to society's well-being.
